The program is configuring the write portion and it needs to be able to write on the blank DVD in order to complete the process.. Click on the big 'RUN NOW' button to the right, then select 'Continue' when your computer asks your permission.. Still not working When i insert the DVD it prompts as 'Formatting the CD' I found the resolution to the Matshita DVD-Ram UJ-850s ATA Device Drivers.

I am using HP Compaq 6710b laptop with Windows Vista, the DVD Drive is not working properly.. For the Read part of it, you need to insert a DVD Disc with something on it such as a program, of any kind.. NOTE: IT IS VERY IMPORTANT THAT YOU INSERT A BLANK DVD IN ORDER TO COMPLETE THIS PROCESS.

Sincerely Skeeter Gz@msn com Hi This could be down to the file shredding software and any others you installed just before this happened, especially if they are of the file cleaning variety, so have you uninstalled those softwares yet to test that once uninstalled and rebooted your PCs drive works ok? What is Make and Model of your laptop, like DELL, HP etc? Boot to safe mode (F8 at boot) and see if it highlights then, reason for asking this is some malwares can stop CD drives from working in an attempt to stop you installing removal software, so without posting a live link can you tell us what File Shredder and Cleaners did you install? So I would uninstall them and then run this guide, but if any malwares are found, then start a new thread and attach as instructed in that guide the logs gained. Then follow the rest of the steps and complete the process Congratulations, you can now use 100% of you DVD device and

there is no risk with altering the registry.. Then Select Detect problems and apply the fixes for me (Recommended) It gives you two options 'Read a CD/DVD and Write a CD/DVD' you will need to run both options separately once for each issue you're having with your hardware.. This is different than altering your registry, and it works via Microsoft Please follow directions carefully or either the Read or the Write won't work.. You will see your device listed, click on your device It will ask you for a disc.. In order for this to work - (YOU WILL NEED A BLANK DVD AND A FULL DVD WITH SOME KIND OF PROGRAM ON IT) Click (or copy and paste) the link above to begin the process. Click on 'RUN NOW' again and follow the same steps When you see the screen with the two options 'Read a CD/DVD and Write a CD/DVD' and 'Write a CD/DVD', this time select 'Write a CD/DVD' option.. The program will continue and configure your DVD device After it completes return back to the first page where it says 'RUN NOW'.. Click on the first option Your CD/DVD drive cannot read or write media in Windows Vista.. Asus pce n15 Insert the disc and click on your device NOTE: If you forget to insert a full DVD Disc your DVD Device door will pop out, then you will be forced to insert a DVD disc with a program on it.. It has the Matshita DVD-ram uj-860H ATA device driver, and i upgraded it online. 34bbb28f04 [Amazon Cloud Cam Mac App](#)
